AVANTAJE

- ✓ Unicul sistem cu o platformă hexagonală de 2.44 mm, **compatibil cu toate diametrele implanturilor.**
- ✓ **Platform Switching** este schimbarea platformei pe interior, tehnologie care previne resorbția osoasă în zona crestală.
- ✓ Filetul din partea superioară a implantului crește suprafața de contact cu osul cortical, astfel favorizând o osteo-integrare rapidă.
- ✓ **Reverse Crown** prin designul său inovator mărește volumul țesuturilor moi, datorită formei concave a bontului care permite gingiei să se dezvolte în jurul lui, astfel obținem un rezultat estetic foarte bun.
- ✓ Vârf atraumatic, suprafață SLA, filet progresiv care crează o compresie osoasă, ca rezultat asigurând o stabilitate primară excelentă.
- ✓ Suprafața de contact dintre "inel" și țesut asigură etanșarea fermă a implantului.
- ✓ Oferim o platformă cu diametrul de 3.3 mm, 3.75 mm, 4.2 mm, 5.0 mm, 6.0 mm, care este compatibilă cu setul de chei Zimmer, MIS, Alpha Bio.
